EXPERIENCE

Tippr
January 2012 - June 2013

- Software Engineer
  Joined a newly formed team in Seattle, took lead of the development of Open Offer Exchange by optimizing and extending the functionality of the existing API to match the needs of its customers.

  Worked on Powered By Tippr, offer publishing platform by modifying existing tools to offer publishing and sales reporting.

Zariba Ltd, http://zariba.com/
September 2009 – July 2011

- Lead Back/Front End Developer   *September 2009 – July 2011*
  Worked as a part of a team including a flash developer and a socket server developer that produced ZaribaGames, a platform for multi-player flash games programmed in PHP5 and Python (Django) that runs on Ngninx/Apache 2.2, Memcache and MySQL 5.1 and provides integration with the Facebook and Yahoo! APIs.

- Lead Back End Developer   *November 2009 – July 2011*
  Used Python (Django) and PHP5 to program the administrative panel supporting several iPhone Games relying on Ngninx/Apache 2.2, Memcache and MySQL 5 for the server side. Implemented the in-app purchases, news and live leaderboards.

- Lead Back End Developer   *June 2011 – July 2011*
  Lead the team that created the company's latest website http://zariba.com/ including server administration and training of newly hired staff.

Knassar, http://knassar.com/
September 2006 - August 2009

- Senior Web Developer   *January 2008 – August 2009*
  Designed and programmed the entire database structure and back end, including the member directory, message board, in site search for http://13mbas.com/, an exclusive online community for top-tier MBA graduates. Implemented the front end designed by the front end developer.

- Junior Web Developer   *September 2006 – January 2008*
  Worked on improving Knassar's main product, the Ivevo CMS. Expanded the system by implementing additional modules like the image management module, the gallery module and the menu editor.
